Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 06 August 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

This office action is responsive to amendment filed on 8/6/2007.

Response to Amendment

The examiner has acknowledged the amended claims 10-12.

Response to Arguments

Applicant's arguments with respect to claims 1-12 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7, and 9-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Hickey et al. (US 2002/0087646 A1, hereinafter Hickey).

Regarding claim 1, Hickey teaches a communication system comprising:

a client-side group email folder accessible by each user in a predefined group of users (FIG. 3 and para. 0037); and

a group email message in the client-side group email folder, the group email message having indicators, each indicator corresponding to a user in the predefined group of users, each indicator being configured to indicate whether the corresponding user has acted upon the group email message (para. 0043).

Regarding claim 2, Hickey teaches the system of claim 1, wherein each indicator comprises a first setting, the first setting indicating that the group email message has not been acted upon by the corresponding user (para. 0079, New).

Regarding claim 3, Hickey teaches the system of claim 2, wherein each indicator further comprises a second setting, the second setting indicating that the group email message has been acted upon by the corresponding user (para. 0043, acted upon information.).

Regarding claim 4, Hickey teaches the system of claim 1, wherein each indicator is further indicative of whether the corresponding user has selected the group email message (para. 0063, first column 143A).

Regarding claim 5, Hickey teaches the system of claim 1, wherein each indicator is further indicative of whether the corresponding user has opened the group email message (para. 0079, Read, Answered, Moved, etc.):

Regarding claim 6, Hickey teaches the system of claim 1, further comprising a second indicator indicative of whether the corresponding user has deleted the group email message (para. 0078, lines 12-20 and para. 0079, lines 1-3).

Regarding claim 7, Hickey teaches the system of claim 1, further comprising means for indicating whether a user has deleted the group email message (para. 0078, lines 12-20 and para. 0079, lines 1-3).

Regarding claim 9, Hickey teaches the system of claim 1, wherein each user represents a unique individual (para. 0051, lines 6-9).

Regarding claim 10, Hickey teaches a communication method comprising:

providing indicators in a group email message, the group email message being located in an inbox, each indicator corresponding to one of the users in a predefined group of users, each indicator having a setting, each indicator configured to indicate whether the corresponding user has acted upon the group email message (para. 0060, step 138 and para. 0061, step 140); and

changing the setting of one indicator in response to the email message being acted upon by its corresponding user (para. 0064).

Regarding claim 11, Hickey teaches the method of claim 10, wherein providing indicators comprises providing read indicators, each read indicator corresponding to one user in a predefined group of users, each read indicator being configured to indicate whether its corresponding user has read the email message (para. 0079, Read).

Regarding claim 12, Hickey teaches the method of claim 10, wherein providing indicators comprises providing delete indicators, each delete indicator corresponding to one user in a predefined group of users, each delete indicator being configured to indicate whether its corresponding user has deleted the email message. each delete indicator being configured to indicate whether its corresponding user has deleted the email message (para. 0078, lines 12-20 and para. 0079, lines 1-3).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2157

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 8 rejected under 35 U.S.C. 103(a) as being unpatentable over Hickey, in view of Stark et al. (US 2003/0233420 A1, hereinafter Stark).

Regarding claim 8, Hickey teaches the system of claim 1, but fails to disclose wherein the indicator is an extensible markup language (XML) tag corresponding to a user in the predefined group. However, Stark shows embedded XML tags that describe certain attributes of messages [Page 3, Para. 0035]. It would therefore be obvious to one of ordinary skill in the art at the time of the invention to incorporate the teaching of Stark into Hickey's system to use XML tag for the indicator corresponding to a user in the predefined group. The motivation would be taking the advantage of the widely accepted language of e-commerce (XML).

Conclusion

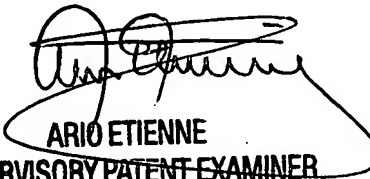

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Lai whose telephone number is (571) 270-3236. The examiner can normally be reached on M-F 8:30 - 5:00 EST.
